SUBJECT: Review of DMA Instruction for Crisis Support

TO: See Distribution List

1. DMA Instruction 8052.6, "Procedures for Obtaining MC&G Products in Support of Crisis Situation", has been rewritten to clarify the definition of situations that are truly a crisis to the U.S. Government and require extraordinary action on the part of DMA and any other organization called upon to render support. In the past, DMA has responded to requests that were not truly crises. In doing so, significant premium personnel costs and disruption to ongoing production programs were incurred. A copy of the draft DMA Instruction revision is attached at Enclosure 1 for your review and comment.

2. In 1978, DMA distributed a brochure titled, "DMA Mapping, Charting, and Geodesy Crisis Support". A portion of this brochure, consisting of the listings of the possible types of crisis support products, has been included as an enclosure to the rewritten DMA Instruction 8052.6. In addition to the updated DMA Instruction 8052.6, information on possible crisis support products and requesting procedures will be added to the General Information section of the "DMA Catalog of Maps, Charts, and Related Products". A copy of the draft text to this catalog is attached at Enclosure 2 for your review and comment.

3. The intent of adding information on DMA Crisis Support to the "DMA Catalog of Maps, Charts, and Related Products", is to consolidate information on all types of DMA support in one document as opposed to the current two documents. We solicit your comments on the merits of this proposal and your views as to the continued need to publish the DMA Crisis Support brochure.

4. Responsiveness to the mapping, charting, and geodesy needs of military users in all situations is the most important objective of DMA. It is the aim of the enclosed draft documents to clarify types of support available in sudden crisis situations and provide streamlined requesting procedures to insure a fast and accurate response by DMA. We would appreciate your prompt attention to the enclosed draft documents and the provision of your comments. Comments should be sent to HQ DMA/PPL by 28 February 1983.

DMA INSTRUCTION 8052.6

SUBJECT: Procedures for Obtaining MC&G Products in Support of Crisis Situations

- REFS:
- a. DoD Directive 5105.40, "Defense Mapping Agency (DMA)", August 10, 1978.
 - b. DMA Instruction 8052.2, "Processing of Requests for Non-Crisis-Unprogrammed MC&G Support", 24 January 1980.
 - c. Joint Operation Planning System (JOPS), Volume IV, (Crisis Action System).

1. Purpose. This instruction establishes procedures for ensuring timely response to requirements by DoD Components and the State Department for Mapping, Charting and Geodesy (MC&G) products in support of crisis situations.

2. Authority. This instruction is issued under the authority delegated in DoD Directive 5105.40, "Defense Mapping Agency (DMA)", August 10, 1978.

3. Scope. This instruction applies to the Defense Mapping Agency (DMA), all DoD Components, and the State Department. Within DMA, it applies to Headquarters (HQ DMA), DMA Aerospace Center (DMAAC), DMA Hydrographic/Topographic Center (DMAHTC), and DMA Office of Distribution Services (DMAODS).

4. Cancellation. This instruction supercedes DMA Instruction 8052.6, subject as above, 16 January 1979.

5. Definitions.

a. Crisis support is defined as the provision of an MC&G product or service, including those not previously validated, needed on a onetime or first time basis where the urgency of the requirement precludes normal processing and production programming action. MC&G crisis support as defined herein, is limited to incidents or situations involving a threat from a source external to the U.S., its territories and possessions that rapidly develop and create a condition of such diplomatic, political or military importance to the U.S. Government that the commitment of U.S. Military Forces and/or resources is contemplated to achieve our national objectives. (JOPS, Volume IV.)

b. Examples of situations which are not considered to be a crisis are:

(1) Provision of MC&G support to the planning and execution of training exercises.

(2) Provision of MC&G support to other situations not involving the possible commitment of U.S. Military Forces/resources where adequate planning time existed to request such support under normal procedures. (DMA will not institute crisis procedures under this instruction where inadequate staff planning failed to consider MC&G support until shortly before the need existed.) During these non-crisis situations users of this instruction are referred to reference b. above, or the standard distribution priorities under the DMA Automated Distribution Management System.

c. MC&G products in support of crisis situations include, but are not limited to, those products/services listed in Enclosure 3.

6. Policy. Requirements for MC&G crisis support generated by OJCS, Defense Intelligence Agency (DIA), the Military Departments, Unified and Specified (U&S) Commands, or other DoD Components, and meeting the definitions outlined in paragraph 5.a., will be given the highest priority by DMA.

7. Procedures.

a. MC&G crisis support required by OJCS and DIA - Call HQ DMA Crisis Management Team (CMT) - Pageboy telephone - 24 hours a day via the National Military Intelligence Center (NMIC).

b. MC&G crisis support required by the Military Departments, U&S Commands, and other DoD Components:

During normal working hours, 0730-1600,
(Washington, DC time), call:

Defense Mapping Agency
Office of Distribution
Services
Autovon: 287-2495
Commercial: (202) 227-2495

Outside normal working hours, call:

*Defense Mapping Agency
Hydrographic/Topographic
Center
Communication Center
Autovon: 287-2196
Commercial: (202) 227-2196

In all cases, transmit backup message to: Defense Mapping Agency
Office of Distribution
Services

(See Enclosure 1)

DMAODS WASH DC//EOC//
INFO: DMA WASH DC//PPL//
DMAHTC WASH DC//PP//
DMAAC ST LOUIS AFS MO//PP//
JCS WASH DC//J3//

*The DMAHTC Communication Center will contact the DMAODS Duty Officer who will effect necessary communication and action to satisfy the requirement. Secure means of communication, both voice and teletype (SPINTCOMM, DACOM and Genser), are available at HQ DMA and DMAHTC for discussing and transmitting classified MC&G crisis requirements.

8. Responsibilities.

a. Military Departments, U&S Commands, and other DoD Components will comply with the procedures for crisis support stated in the General Information section of the DMA Catalog of Maps, Charts, and Related Products.

b. HQ DMA Programs, Production and Operations Directorate (PP) will:

(1) Form a HQ CMT with the Team Coordinator drawn from the Land Combat Division (PPL), and alternates drawn from the Aerospace Division (PPA) and the Hydrographic Division (PPH).

(2) Provide DMA/OJCS, DMA/NMIC, DMA/NMCC, DMA/DIA, and DMA/State interface in crisis situations through the HQ CMT.

(3) Use the CMT to monitor DMA Component activities in support of crisis situations.

(4) Use the CMT to brief the HQ Command Section on a daily basis for the duration of the crisis.

(5) Task Production Centers to produce crisis MC&G products.

(6) Assure that timely response is provided to requestors of MC&G products in crisis situations.

(7) Advise DMAODS CMT of ongoing crisis actions and any requirements for transportation support.

(8) Provide an after-action report to the requester and to OJCS as necessary.

c. DMA Office of Distribution Services will:

(1) Establish a CMT and procedures to expeditiously service duty and non-duty hours crisis support requests.

(2) Acknowledge receipt of requirement to requestor, advise as to disposition of requirement, coordinate an arrangement for shipping of products, and provide name and telephone number of DMAODS point of contact.

(3) Advise HQ CMT Coordinator of all ongoing actions.

(4) Expeditiously provide off-the-shelf copies of products available and coordinate with the Production Centers' (PP) staffs on items shipped and those to be produced (i.e., reprint of existing items, update of existing items, or production of emergency products).

(5) Advise the HQ CMT Coordinator of requirements to produce crisis MC&G products not available as a standard DMA product. In those situations where quick time response is imperative and the HQ CMT Duty Officer is not immediately available, the DMAODS CMT Duty Officer has the authority to task the Production Center's (PP) staff for production of crisis MC&G products.

(6) Follow up on all shipments to assure delivery. Take immediate corrective action if delivery appears to be failing.

(7) Provide an after-action report (see Enclosure 2) to HQ CMT Coordinator within five working days after satisfying a crisis support request.

d. DMA Production Centers (PP) will:

(1) Establish a CMT and procedures to expeditiously service duty and non-duty hours crisis support requests.

(2) Determine products to be produced, and coordinate with DMAODS on items to be shipped directly from the Production Centers.

(3) Contact requestor and provide information on products to be produced and when those products will be available.

(4) Promptly inform HQ CMT Coordinator of products to be produced and ongoing actions.

(5) Expeditiously coordinate with other Production Centers (PP) for source data input.

(6) Provide name and telephone number of point of contact to requestor as necessary.

(7) Provide an after-action report (see Enclosure 2) to HQ CMT Coordinator within five working days after completing production.

9. Effective Date. This instruction is effective upon publication.
